**WYBRON INFOTRACE CONTROL AND MANAGEMENT SYSTEM WINS
BEST DEBUTING PRODUCT OF THE YEAR AWARD AT LDI 2006**

***Only Lighting Design Manufacturer To Receive Product Award From Top
Two Industry Trade Shows In The Same Year***

Colorado Springs, CO – October 24, 2006 – Wybron, Inc., a leader of entertainment and architectural lighting technology, today announced it has received the Best Debuting Product of the Year Award in the lighting category from Lighting Dimensions International (LDI) 2006 for the InfoTrace Control and Management System. InfoTrace (IT) is a new lighting design system that uses Remote Device Management (RDM) to control and manage Digital Multiplex (DMX)-controlled devices, such as color changers, moving lights, fog machines and dowsers.

“We are delighted to have been selected for the LDI 2006 Best Debuting Product Of The Year Award,” said Keny Whitright, Chairman and Founder of Wybron. “We are excited to have received both the LDI award and the PLASA innovation award in the same year for the second time.”

In September, Wybron won the coveted PLASA 2006 Award for Innovation for the quality of design, concept and development of the InfoTrace System. Previously in 1994, Wybron’s Autopilot II System garnered both the LDI and PLASA awards, as well. Wybron is the only lighting equipment manufacturer to have ever received both awards in the same year.

Wybron received the prestigious LDI award during a special ceremony held on Saturday, October 21 at LDI 2006 at the Las Vegas Convention Center. Whitright and Larry Turner, Wybron CEO, accepted the award from LDI and *Live Design* magazine. The InfoTrace System was selected by a panel of judges who chose Wybron’s product from

a host of other outstanding new technology and product advancements.

“We strongly believe that the InfoTrace System will make it easier for everyone involved with managing the increasing complexity of lighting shows,” said Turner. “The InfoTrace System provides a wealth of information about potentially every piece of gear on a rig. We are pleased that the LDI judges recognize our outstanding contribution to advancing the lighting industry.”

About Wybron, Inc.

Wybron www.wybron.com has been advancing the art of lighting across the entertainment and architectural industries with state-of-the-art, award-winning solutions. Recognized as one of the world’s leading innovators in the lighting field, the company’s products are used in Broadway shows, including A Chorus Line, Beauty and the Beast, Chicago, Lion King, Spamalot and The Producers and in Las Vegas Blue Man Group and Cirque du Soleil KÁ.
