WYBRON INTRODUCES PERMANENT INSTALL POWER SUPPLY

Colorado Springs, CO – July 26, 2007 – Wybron, Inc., a leader of entertainment, houses of worship and architectural lighting technology, has introduced the PS 450i power supply, one of the company's latest permanent install product offerings.

The PS 450i is RDM compatible and is modeled after Wybron's popular PS series power supply products. This new permanent power supply is compatible with Wybron's Nexera and Forerunner, as well as all of the company's InfoTrace System products, including the Coloram IT, CXI IT, Eclipse IT and Eclipse II IT.

"We are receiving more client requests for permanent installation products for theatrical and architectural applications," said Larry Turner, Wybron's CEO. "Therefore, we designed the PS 450i power supply to fill the greater need for this type of product."

The PS 450i is designed to easily mount to a wall or unistrut and has multiple convenient conduit knockouts. All connections are on terminal blocks with separate blocks for main power and low voltage/data. The 450i differs from other PS series power supplies by using three discreet 150w, 24v outputs. The PS-450i is UL listed.
