WYBRON INTRODUCES CMY FIBER ILLUMINATOR

Colorado Springs, CO – March 7, 2007 – Wybron, Inc., a leader of entertainment, houses of worship and architectural lighting technology, has introduced its latest product offering, the Transition, a CMY Fiber Illuminator. The Transition is an ultra bright illuminator that uses a similar CMY dichroic color mixing technology as Wybron's Nexera lighting fixtures. The Transition offers smooth color changes with nearly infinite color choices and silent operation.

“We developed The Transition to fill our clients’ growing need for a fiber illuminator with superior light output, an unlimited color palette and virtually quiet operation. Because The Transition does not radiate heat at the front of the unit, museums, aquariums, water parks, ice rinks, landscaping and environmental lighting designers, as well as our casino clients are utilizing it to light perishable assets and exhibitions from animals to artwork, food, wine and ice sculptures.”

The advantage of using fiber optics is that the light source is separated from the light output, and its fiber optic strands do not conduct UV radiation. All of which allows practically heatless illumination.

The Transition allows the fiber common ends to remain cool and the unit will not burn PMMA fiber. It has a compact design that measures less than 6 inches wide and weighs just less than 8 pounds. The Transition includes an integral electronic ballast and power supply. It uses a 150 watt compact UHI light source and has a 10,000 hour lamp life, making it extremely energy

- more -

efficient. It accepts 17 through 34 mm common end fiber bundles and is RDM compliant. The Transition can be placed in an accessible location for easy maintenance.

About Wybron, Inc.

Wybron is advancing the art of lighting through collaboration with its customers across the entertainment, houses of worship and architectural markets. The company consistently develops state-of-the-art, award-winning solutions. Recognized as one of the world's leading innovators in the lighting field, the company's products are used in Broadway shows, including A Chorus Line, Beauty and the Beast, Chicago, Lion King, Spamalot and The Producers and in Las Vegas Blue Man Group, Cirque du Soleil KÁ and Spamalot. As well as the entertainment fields, houses of worship and commercial architects, Wybron also serves cruise ships, theme parks and casinos throughout the U.S. and across the globe.

For more information about The Transition and other Wybron products, please call the Wybron Sales Department at 1-800-624-0146 or visit the company's Web site at www.wybron.com.
