WYBRON AWARDED PATENT

***Light Assembly Color-Changing System Integral to Nexera and Other
Wybron Products***

Colorado Springs, CO – January 29, 2007 – Wybron, Inc., a leader of entertainment, houses of worship and architectural lighting technology, announced today that it has been granted U.S. Patent no. 7,163,317. The patent covers Wybron’s core technology relating to its dichroic CMY color–changing system that allows for graceful color fades across a wide spectrum, inside profile and wash style fixtures. This technology is integral to Wybron’s family of Nexera fixtures.

“For more than 25 years, Wybron has continually invested in innovating and developing advanced lighting systems,” said Larry Turner, CEO of Wybron. “We listen to our customers and base our unique designs on their demands. Because of positive customer feedback, we are integrating this patented technology into new products like our fiber-optic illuminator. We intend to launch this new product in the coming weeks.”

The Nexera utilizes a set of cyan, magenta, and yellow dichroic filters, which are introduced into the beam of light, controlled by DMX values set at the lighting console. The Nexera’s filters are etched with a unique pattern to allow for smooth color across the field.

Nexera models include: wash, as well as profile zooms at 19°-26° or 25°-40° beam spreads. Available with a 575w tungsten or long life CDM sources. All Nexeras are

convection cooled, allowing for nearly silent operation. The Nexera also can be used with other Wybron products on the same power supply (PS) series.

Nexeras are now being integrated into Wybron's InfoTrace family, joining ColorRams, CXIs and Eclipse dowsers. The InfoTrace system allows full RDM functionality, including remote DMX addressing, discovery and enhanced trouble-shooting ability for an entire lighting system.

About Wybron, Inc.

Wybron is advancing the art of lighting through collaboration with its customers across the entertainment, houses of worship and architectural markets. The company consistently develops state-of-the-art, award-winning solutions. Recognized as one of the world's leading innovators in the lighting field, the company's products are used in Broadway shows, including A Chorus Line, Beauty and the Beast, Chicago, Lion King, Spamalot and The Producers and in Las Vegas Blue Man Group and Cirque du Soleil KÁ. As well as the entertainment fields, houses of worship and commercial architects, Wybron also serves cruise ships, theme parks and casinos throughout the U.S. and across the globe.

For more information about Nexera and other Wybron products, please call the Wybron Sales Department at 1-800-624-0146 or visit the company's Web site at www.wybron.com.
