## **WYBRON SECURES THREE INFOTRACE SYSTEM INSTALLATIONS IN FIRST QUARTER OF 2007**

Colorado Springs, CO – May 15, 2007 – Wybron, Inc., a leader of entertainment, houses of worship and architectural lighting technology, announced that it has secured three installations of its InfoTrace Control and Management System. The system has been installed in Manhattan Theatre Club, Royal Caribbean's newest ship Liberty of the Seas and the permanent installation of Spamalot in Las Vegas.

"Wybron is committed to making great solutions that support our customers' art and allow them to better manage their lighting designs," said Larry Turner, CEO of Wybron. "We are pleased that Manhattan Theatre Club, Royal Caribbean and Spamalot chose our InfoTrace Control and Management System. Accepting the RDM platform places them at the forefront of the industry, and we appreciate their enthusiasm for our new products. We expect to see the number of InfoTrace installments increase throughout the year as RDM catches on."

All three of these clients loaded in InfoTrace during the first quarter of 2007, only a few months after it won the LDI, PLASA and WFX new product awards. These installments mark the first InfoTrace placements since Wybron launched the system in the fall of 2006. Each helps the company expand acceptance of RDM-compatible products, including its COLORAM IT, CXI IT, Eclipse IT and Eclipse II IT.
