WYBRON SEEKS INPUT FROM LIGHTING INDUSTRY

COLORADO SPRINGS, COLO. – Wybron, Inc., a veteran lighting company serving the entertainment, house of worship and architecture industries, invites lighting professionals to discuss and critique its new and changing products during an open house June 4 in New York City.

Wybron President Keny Whitright and Vice President of Engineering Lee Schlais will spend 10 a.m. to 5 p.m. June 4 at the Film Center Building, 630 9th Ave., Suite 1001, in the offices of Electronic Theatre Controls. They'll talk about Wybron's new lighting technology as well as improvements to the company's existing products, including its InfoGate software, which uses industry-standard talkback protocols to help users manage their lighting rigs remotely without actually handling the devices.

“We really want to involve members of the lighting industry with our product development to see if they want anything added or changed,” Whitright said. “They're the individuals who use what we make, and we want to make sure that how our products run actually helps them do their jobs.”

The open house won't adhere to a rigid schedule, allowing attendees to drop by and meet with key Wybron staffers anytime between 10 and 5.

For more information, call Wybron at (719) 548-9774 or visit www.wybron.com.

ABOUT WYBRON

Wybron, Inc. designs and manufactures innovative, practical and high-quality lighting equipment for some of the biggest entertainment productions in the world. Wybron remains committed to standardized two-way communication protocols that help users more easily manage their lighting rigs. Learn more at www.wybron.com.
